\*Federal Law restricts the number of preauthorized or automatic transfers from your share savings or money market account to any other credit union account or third party to six (6) transfers per statement period. Transfers done through online banking or transfers caused by overdrafts are included in this six (6) limit. For example, your share savings account is set up for automatic transfers in the event of non-sufficient funds in your share draft account. These such transfers are preauthorized transfers and count toward the six (6) transfer limit.
